Task 1 coverage audit

A check of the final spec pack against the original Task 1 conversation and the v9.1 brainstorm — what's covered, where, and what's deliberately left out.

IRONWRAP EXTERIORS • REV. JUNE 2026

This audit checks the final pack against the original Task 1 recap and the v9.1 documents. The separate sellable metal-layout SaaS idea is not part of this pack — the current scope is Task 1: IronWrap's internal operating system.

Original Task 1 coverage

ORIGINAL TOPIC	COVERED IN	STATUS
Internal system for IronWrap with automations	README, 01, 02, 06, 12	Covered
JobNimbus as CRM / job system	00, 02, 03, 04, 06	Covered
GoHighLevel for lead intake, nurture, SMS, reviews	00, 02, 03, 04, 06	Covered
Website funnels and qualified-lead capture	README, 00, 01, 02, 03, 04, 07, 10, 15	Covered as Task 1 internal-OS intake
Google Business Profile and local lead trust	00, 02, 06, 08, 11	Covered as a Task 1 checklist
UTM / source / call attribution	02, 03, 06, 09, 10, 12, 13	Covered
Paid local lead readiness gate	00, 08, 11, 12, 15	Covered as a gated decision
Make for automation outside JobNimbus, incl. storage changes	00, 02, 06	Covered
Google Drive folder automation	00, 02, 03, 06	Covered; Drive is the first-deliverable default
QuickBooks accounting	00, 03, 04, 06, 08	Covered

ORIGINAL TOPIC	COVERED IN	STATUS
Review chasing	04, 06, 10, 11	Covered
Payment chasing	04, 08, 10, 11	Covered
Booking agent	02, 04, 05, 10	Covered
Phone AI automation layer	05, 06, 08, 09, 10, 11, 12	Covered
NaturalForms for what JobNimbus lacks	00, 02, 04, 06, 08, 11, 15	Covered as first-deliverable field layer
Paradigm for shop / production	00, 02, 06, 08, 13	Covered as deferred bridge
Renoworks visualization	00, 03, 06, 07, 08, 10	Covered as gated add-on
Website visitor uploads photo, plays with roof / walls / colors	03, 07, 09, 10	Covered if Renoworks active
Renoworks shares product / color / engagement stats	03, 06, 07, 10	Covered if exportable
3D models / selected home model	03, 07	Covered if Renoworks active
Embed or link visualizer in proposal / PDF / HTML	04, 07, 10	Covered as gated option
PDF / proposal export	04, 07, 10, 12	Covered
Measurement reports and document parsing	07, 10, 12	Covered
Field forms and documents	04, 11, 12	Covered
Material request, supplier, shop flow	04, 06, 12	Covered
Payment methods, Moneris, FinanceIT	08, 09, 10, 11, 13	Covered as validation gates
Security / access after build / config / test	02, 09, 10, 11	Covered, final phase
Separate SaaS for North America installers / suppliers	00, 13, this file	Explicitly excluded from Task 1

v9.1 document coverage

V9.1 DETAIL	FINAL-PACK TREATMENT
Residential, commercial, shop/supply, and raw-steel divisions	Added to business context, data model, AI routing, and backlog
Owner/commercial sales, residential rep, receptionist/materials roles	Added to business context
18% close-rate and lost-lead risk	Kept as planning context, not guaranteed current truth
60 RoofRuler reports/month	Treated as expansion volume proof, not Task 1 spend
Renoworks CAD setup and annual cost	Included in cost gates
Paradigm setup / monthly cost	Included as deferred ERP / shop bridge
NaturalForms per-user planning cost	Kept as context; first deliverable assumes the subscription exists
AI receptionist setup / monthly planning cost	Included in pricing notes
12 forms / document types	Added to Workflow 5B
Custom proposal tool	Covered as NaturalForms / HTML / PDF proposal first
Contract platform open decision	Added as build and QA gate
Material-list design open decision	Added as build and QA gate
Moneris payment options	Added as payment-stack validation
FinanceIT financing	Added as gated financing / payment option
WooCommerce / hosting	Explicitly deferred from Task 1
Calgary expansion	Explicitly deferred unless the owner adds it
AppliCad XML structured measurement data	Added to measurement-parsing spec
Image-heavy / sparse siding, gutter, soffit reports	Added to OCR / human-review requirement

Remaining owner decisions

These aren't gaps — they're decisions IronWrap makes before the related workflow goes live.

1. Confirm Google Drive as the storage authority, unless the owner overrides.
2. Choose the contract / signature path — JobNimbus / native proposal or NaturalForms.
3. Choose the material-list format — one multi-scope list or separate per-scope lists.
4. Approve the Phone AI pilot scope — missed-call only, after-hours too, or selected inbound after review.
5. Decide whether Renoworks is part of the first paid production expansion.
6. Approve which payment methods appear in proposals.
7. Approve FinanceIT wording and dealer economics before showing financing.
8. Confirm the NaturalForms plan level and whether the REST API is included.
9. Add Paradigm only after the manual material workflow is stable.

Audit result

RESULT

No Task 1 topic from the original recap is intentionally missing from the final spec pack. The only major topic excluded is the separate SaaS product idea — because the current instruction is to focus only on Task 1. Website funnels, Google Business Profile, attribution, and the paid-lead readiness gate are Task 1 internal-OS items — capturing more qualified leads from assets IronWrap already owns — not the separate metal-layout SaaS project.
