Data model & source of truth

Who owns each piece of data, what's allowed to mirror it, and the single canonical job reference that everything else hangs off.

IRONWRAP EXTERIORS • REV. JUNE 2026

Source-of-truth map

Every data area has exactly one system of record. Other systems may mirror it for convenience, but they never overrule it.

DATA AREA	SYSTEM OF RECORD	MIRROR ALLOWED IN	NOTES
Lead source & attribution	GHL	JobNimbus	GHL owns marketing / lead attribution; preserve source URL, landing page, page type, UTM, and call source.
Conversations	GHL	JobNimbus note summary	Store summaries, not every raw log everywhere.
Customer / contact	JobNimbus (after qualification)	GHL	GHL is lead-facing; JobNimbus is job-facing.
Property	JobNimbus	GHL	Normalize the address early.
Job	JobNimbus	GHL custom fields	JobNimbus owns the job number and stage.
Appointment	GHL Calendar	JobNimbus task / event	Avoid competing calendars.
Files	Google Drive	Links in GHL / JobNimbus	Archive only.
Measurements	JobNimbus + folder	Proposal workspace	Extracted values need a review status.

DATA AREA	SYSTEM OF RECORD	MIRROR ALLOWED IN	NOTES
Proposal	JobNimbus / proposal generator	Folder, GHL status	Versioned.
Field forms / signatures	NaturalForms	JobNimbus notes/tasks, folder PDFs	NaturalForms owns the completed document; JobNimbus owns job state.
Materials	JobNimbus + NaturalForms first	Paradigm (after approval)	Manual flow first.
Invoice / payment	QuickBooks	JobNimbus status fields	QuickBooks owns accounting truth.
Reviews / nurture	GHL	JobNimbus event / status	Must respect consent and stop conditions.
Automation logs	Make + optional audit table	Exceptions view	Every critical mutation logged.

IDs & external references

Don't force every system onto the same ID. Keep one canonical job reference, and store everything else as external references hanging off it.

CANONICAL

`job_number` — owned by JobNimbus.

EXTERNAL REFERENCES

```
{
  "job_number": "26-171-ABN",
  "external_refs": [
    {"system": "ghl",         "type": "contact",     "id": "ghl_contact_id"},
    {"system": "ghl",         "type": "opportunity", "id": "ghl_opportunity_id"},
    {"system": "jobnimbus",   "type": "job",         "id": "jn_job_id"},
    {"system": "naturalforms","type": "document",    "id": "nf_document_id"},
    {"system": "drive",       "type": "folder",      "id": "folder_id"},
    {"system": "quickbooks",  "type": "invoice",     "id": "qb_invoice_id"}
  ]
}
```

Core objects

Contact

- First name.
- Last name or company.
- Phone.
- Email, if available.
- Preferred contact method.
- Consent status.
- Lead source.
- GHL contact ID.
- JobNimbus contact ID.

Rules. Phone is the strongest dedupe key; email is secondary. A matching address with a similar name must be flagged for review before any merge.

Property

- Street address.
- City.
- Province.
- Postal code.
- Country.
- Property type.
- Service-area status.

Rules. Store the normalized address once. Don't parse property details out of notes when structured fields already exist.

Lead

- Source.
- Source URL / page.
- Landing page.
- Page type — home, quote, contact, service, city, blog, comparison.
- Campaign / referral.
- UTM source.
- UTM medium.
- UTM campaign.
- UTM content.
- UTM term.
- Call source / number.
- Service interest.
- Urgency.
- Insurance / hail flag.
- Uploaded file / photo link.
- Initial notes.
- Lead owner.
- Next action.
- First response timestamp.
- First response time.
- Qualification status.

Qualification statuses. New · Contacted · Qualified · Not qualified · Duplicate · Lost.

Job

- JobNimbus job ID.
- Canonical job number.
- Customer.
- Property.
- Division — Residential, Commercial, Shop/Supply, Steel/Distribution.
- Scope — roof, siding, gutter, soffit, fascia, commercial, supply/shop.
- Stage.
- Owner.
- Appointment date.
- Estimate due date.
- Proposal status.
- Deposit status.
- Materials status.
- Schedule status.
- Invoice status.

Measurement package

- Provider — AppliCad, RoofRuler, photos, manual, other.
- Source — RoofRuler email, manual upload, folder watcher, field capture.
- Files.
- Original email sender / message ID, if received by email.
- Extracted values.
- Confidence.
- Review status.
- Reviewed by.
- Reviewed at.

Rules. Use structured XML before OCR. OCR alone can't set final pricing without human review.

Proposal

- Version.
- Proposal URL.
- PDF URL.
- Options.
- Products / colors.
- Visualizer link, if active.
- Sent date.
- Viewed date, if available.
- Accepted / signed date.
- Deposit requested date.

Materials

- Material request status.
- Product / profile.
- Color.
- Supplier.
- Required date.
- Shop / supplier notes.
- Ready status.
- Blocking issue.

NaturalForms document

- NaturalForms document ID.
- Template / form type.
- JobNimbus job ID.
- Job number.
- Customer / property reference.
- Assigned user / crew.
- Form status.
- Completion timestamp.
- Signature status, if applicable.
- PDF / output URL.
- Photos / sketches attached.
- Make scenario / run ID, if routed through Make.

Rules. Completed NaturalForms documents are evidence and field records. JobNimbus still owns job stage, owner, and the canonical job number; QuickBooks still owns invoice/receipt truth. Never create QuickBooks invoices directly from NaturalForms without office review.

Finance

- Deposit requested.
- Deposit paid.
- Invoice created.
- Invoice paid.
- Payment overdue.
- Payment method — cash, cheque/draft/direct deposit, Interac e-Transfer, Interac debit, credit card, FinanceIT, other.
- Financing interest.
- QuickBooks customer ID.
- QuickBooks invoice ID.

Rules. Never store card, banking, PAD, or financing documents in AI tools or broad CRM notes. QuickBooks owns the final accounting state.

Visualization lead intent

Required only if Renoworks is active:

- Renoworks session ID / link.
- Uploaded home photo or selected model.
- Engagement / interest stats, if exportable.
- Proposal embed / link state.
- Mapped GHL contact / opportunity ID.

- Surface changed — roof, siding/walls, soffit/fascia/gutter, if available.
- Product / profile clicked.
- Color clicked.
- Mapped JobNimbus job ID after qualification.

Rules. Renoworks is lead intent and visual-sales data — not job truth. Product/color interest must become structured CRM fields if sales uses it. A proposal may embed or link the visualizer only after privacy and content review.

Event model

Every event carries an idempotency key, so a replay never double-creates.

EVENT	PRODUCER	CONSUMER	IDEMPOTENCY KEY
`lead.created`	GHL, website, ad, phone, Renoworks	Make / relay, JobNimbus	source + phone/email + created day
`call.completed`	GHL AI or voice provider	GHL, JobNimbus	call provider ID
`appointment.booked`	GHL calendar	JobNimbus	appointment ID
`job.qualified`	Sales / JobNimbus	Folder automation	JobNimbus job ID
`measurement.email_received`	RoofRuler email	Make / parser / folder	message ID + attachment hash
`measurement.uploaded`	Staff / folder watcher	Parser / OCR	file hash + job ID
`form.completed`	NaturalForms	Make, JobNimbus, folder	NaturalForms document ID
`proposal.sent`	Proposal tool	GHL, JobNimbus, folder	proposal ID + version
`proposal.accepted`	Proposal / signature	JobNimbus, QuickBooks task	proposal ID + version
`deposit.paid`	QuickBooks / payment flow	JobNimbus	QuickBooks payment ID
`materials.ready`	Office / shop	JobNimbus	material request ID
`job.completed`	Field / JobNimbus	QuickBooks / review flow	job ID + completion date

EVENT	PRODUCER	CONSUMER	IDEMPOTENCY KEY
`invoice.paid`	QuickBooks	JobNimbus	QuickBooks invoice / payment ID
`automation.failed`	Make / relay	Admin	scenario run ID
